Crimped Wire Mesh

**Double Intermediate
& Lock & Flat Top &
Slot Hole Crimped**

Double Intermediate & Lock Flat Top & Slot Hole Crimped

Double Intermediate Crimped

Both the warp and weft wires are crimped with every three crimps or corrugations between the points of intersection.

Lock Crimped

To prevent skewing of the mesh, the wires are pre-crimped at their point of intersection, so that warp and shute wires embrace each other over a half of their circumference.

Flat Top(Smooth Top) Crimped

All crimping is offset to the bottom side, producing a smooth top surface, there are no projections on top to wear.

Slot Hole Crimped

Various kinds of slot length can screen materials in various kinds of different length
